JavaScript, TypeScript, Angular, Node.js, SQL, Java, C++, Agile Development cycle, Jira, Zendesk, Confluence.

Professional Experience

Digital Schools, Salinas CA

Quality Assurance Engineer, January 2019 - May 2020

- Reviewed TypeScript and SQL code to pinpoint root cause of issue.
- Helped to design a user interface for easier navigation.
- Created test cases, documented and reported issues in newly developed code using Jira.
- Assisted with continued improvement in the software and performance testing process.

Digital Schools, Salinas CA

Support Tech II, July 2018 - May 2020

- Troubleshoot issues reported by clients on zendesk in order for a more streamlike user interface experience.
- Implement new user data into the servers in order to use the software.
- Created reports for clients from a relational database using SQL queries to present to State and Federal agencies.
- Updated and maintained databases for school districts throughout California.

North County Recreation and Park District, Castroville CA

Intern, January 2018 - May 2018

- Created a mobile application that would keep track of students checking into the facility in order to allocate funding from the state.
- Updated and maintained the organization's website for event planning.

Heaven on Earth Furniture, Salinas

Web Developer/Technology Consultant, January 2011 - July 2018

- Created and updated products on the company's website when new inventory would be released and/or available.
- Help with the transition from paper records of finance to Quickbooks accounting software.
- Provide training and support to the sales team when new technology was adopted.

Education

BS, Software Engineering - May 2018

California State University Monterey Bay, Seaside CA

AA, Software Engineering - May 2016
